Our Chapter Mission Statement

Maintain and promote the highest competency standards, safety, and education for drilling, blasting, seismology and explosives engineer professionals.

Letter from The President

Dear Members,

June was National Safety Month! As we sail through the summer into July, please remember safety is a year-round commitment.

At the end of July, we will host, along with the Mid-Atlantic Chapter, a 2026 Blasters' Training. Are you in need of blasters license hours or want to stay up to date on best practices in our industry? Then don't miss the 2026 Blasters' Training on July 30 at the Wyndham Garden State College in Boalsburg, PA. Our exciting speaker line up is featured on page 4 and a link to registration is available on page 3. We hope you can join us!

Another exciting event that is quickly approaching is our Clay Shoot & BBQ. This year's event is our tenth annual Clay Shoot & BBQ. We know many members look forward to this event each year. Registration is open and station sponsorship opportunities are available.

Finally, our Chapter is looking for a new Regulatory Chair. If you are interested or need more information about the position, please contact me.

Best regards,

Ron Eichler

2026 Blasters' Training Agenda

Thursday, July 30, 2026

7:00 – 7:45 am	Registration
7:45 – 8:45 am	Roadside Enforcement of the HMR (Hazmat Regulations) Presented by Trooper First Class Michael Brooks - Pennsylvania State Police
8:45 – 9:30 am	Explosives Identification and Awareness for ISEE Blasters Training Presented by Corporal Nathaniel J. Drayer – Pennsylvania Bureau of Emergency & Special Operations
9:30 – 10:15 am	ATF Regulatory Overview Presented by Karin L. Blevins - Bureau of Alcohol, Tobacco, Firearms and Explosives
10:15 – 10:30 am	BREAK
10:30 – 11:15 am	Stemgel, Is it the future? Presented by Evan Thibaud, PNEU Wave Consulting
11:15 – 12:00 pm	Pre-Blast Inspections, Seismograph Placement & Dealing with Blasting Complaints Presented by Justin Elkin, Sauls Seismic
12:00 – 12:30 pm	LUNCH
12:30 – 1:15 pm	Safe and Productive Drilling Practices Presented by Eric Crosson, Gill Rock Drill Co., Inc.
1:15 – 2:00 pm	Accident Prevention Presented by Kyle Scribe, Alpha Safety USA
2:00 – 2:45 pm	Flyrock Presented by Tom Hairhoger - Austin Powder Company
2:45 – 3:00 pm	BREAK
3:00 – 3:45 pm	AI Can't Do a Pre-Blast Survey Presented by Benny Staudt, P.G. - Vibra-Tech Engineers, Inc.
3:45 – 4:15 pm	Current Compliance Issues Presented by Christopher D Catalano - Department of Environmental Protection
4:15 – 4:45 pm	Regulatory Panel Facilitated by Christopher D Catalano - Department of Environmental Protection
4:45 – 5:00 pm	Door Prizes

Blasters' Training Sponsorship

Sponsorship opportunities are available for the 2026 Blasters' Training.

All of our sponsors will be acknowledged via signage at registration and during the training program. Deadline to sponsor is July 23, 2026.

See how we accelerate
the transformation

Most people say that three things are
transforming our industry. I say it's four.

ACCELERATE THE TRANSFORMATION

Electrification, digitalization and automation are fundamentally transforming the mining and construction industry. But what many forget is the fourth aspect: the people behind the innovations. Because only new ideas can speed up the shift toward a more sustainable mining and construction industry. We at Epiroc accelerate this transformation.

All Clear? The Last Step Before Detonation

Reprinted from the International Society of Explosives Engineers Website

Posted on June 23, 2026

“All clear” is more than a sign before detonation, it’s the end result of planning, communication and teamwork. This article explores the steps required to secure a Blast Area and make informed go/no-go decisions, reinforcing that safety is a commitment that extends far beyond Safety Month.

Before any blast can proceed, one question needs to be answered:

All Clear Continued

Is the area truly “all clear”?

It is a phrase heard across job sites every day, but behind those two words is one of the most important responsibilities in blasting. Reaching “all clear” does not happen by chance. It requires planning, communication, and the commitment of everyone involved.

At ISEE, Safety Month is an opportunity to highlight the practices that keep people safe. But safety is not something we focus on for just one month each year. It is a year-round commitment that supports our mission to enhance the safety, science, skill and benefits of explosives engineering, worldwide.

The path to “all clear” begins long before the first hole is loaded. Blast crews and operations personnel review the Blast Area Security Plan to confirm:

- Expected blast time
- Blast Area and site dimensions
- Access control responsibilities and who is guarding entry points
- Communication protocols leading up to detonation
- This early coordination ensures everyone understands where and when the blast will occur, and how the Blast Area will be secured and controlled.

All Clear Continued

As loading progresses, communication remains critical. The blaster-in-charge must be informed of any conditions that could affect the blast, including:

- Holes drilled too short or too deep
- Incorrect explosive loading
- Stemming inconsistencies
- Connection or tie-in problems

These issues, when communicated in real time, allow the blaster to either mitigate the problem or determine if blast timing or Blast Area boundaries need to be adjusted.

All Clear Continued

Then comes the final check.

Before detonation, a go/no-go decision is made to confirm whether it is truly safe to proceed. The blast should only fire when there is confidence that the Blast Area is secure, all personnel are accounted for, and conditions are acceptable. If unresolved concerns remain, escalation to supervisors or managers is essential, and it is always better to delay than to fire under unsafe conditions.

Even when everything has gone to plan, maintaining a sufficiently sized and completely evacuated Blast Area remains critical. It accounts for unknowns such as geological variability and ensures everyone remains out of harm's way.

Because "all clear" is more than a signal.

It is the result of careful planning, clear communication, and a shared commitment to protecting people.

Every blast. Every shift. Every day.

NSSGA Celebrates 70th Anniversary of Interstate System

Reprinted from the NSSGA News, June 29, 2026

ALEXANDRIA, VA. – National Stone, Sand & Gravel Association's President and CEO Michele Stanley issued the following statement on the 70th anniversary of the Interstate Highway System.

"Today marks the 70th anniversary of the Interstate Highway System and the passage of the National Interstate and Defense Highways Act, which was signed into law by President Dwight D. Eisenhower. This historic investment in our nation's highways transformed our country, connected communities and powered commerce, laying the foundation for the prosperous nation we are today. NSSGA members proudly play an essential role in building and maintaining over 47,000 miles of interstate by supplying the 38,000 tons of aggregates material required to construct every mile of four-lane highway. Their work helps ensure safe, durable roads that support the nation's transportation and economic needs.

"Now we must look to the future to modernize and strengthen this system. This milestone anniversary, along with America's 250th Birthday, serves as a reminder of the critical need to pass a multi-year surface transportation reauthorization bill this year. We urge the House of Representatives to consider and pass the BUILD America 250 Act, and the Senate to also take up legislation, to secure the future of our interstate legacy."
